

Remarks:

Claims 25-56 are pending in this application. Applicant respectfully requests favorable reconsideration of this application.

Applicants submit herewith on a separate sheet an abstract of the disclosure.

The Examiner rejected claims 1-35 under 35 U.S.C. § 102(e) as being anticipated by U.S. patent 6,717,516 to Bridgelall.

Bridgelall does not disclose the present invention as recited in claim 1 since, among other things, Bridgelall does not disclose selecting a data quantity from the databases where the selected data quantity forms a reduced part of the extensive information about the industrial automated facility, adapted to the users specific needs. The Examiner asserts that such features are disclosed by Bridgelall at col. 1, line 46 to col. 2 line 51. This passage does not disclose such features. Rather, this passage discloses a wireless communication protocol between slave units and RFID tags. This passage discloses arrangement of devices and details of transmission and reception of signals. There is no disclosure of the above features recited in claim 1.

Additionally, Bridgelall does not disclose communicating data quantity from a central control and presenting the first data quantity on a display of a user terminal as recited in claim 1. Not only does Bridgelall not disclose these features, but the terms display, terminal, and user do not appear anywhere in Bridgelall.

In view of the above, Bridgelall does not disclose the present invention as recited in claim 1 and claims 2-16 and 33-35, which depend from claim 1.

Bridgelall does not disclose the present invention as recited in claim 17 since, among other things, Bridgelall does not disclose a number of movable user terminals having an information display or a central control and information system having access to at least one database including extensive information about the industrial automation facility. Bridgelall does not include any disclosure of displays or terminals. Therefore, Bridgelall also does not disclose the present invention as recited in claim 17 or claims 18-32, which depend from claim 17.

In view of the above, Bridgelall does not disclose all elements of the present invention as recited in claims 1-35. Since Bridgelall does not disclose all elements of the present invention as recited in claims 1-35, the present invention, as recited in claims 1-35, is not properly rejected under 35 U.S.C. § 102(b). For an anticipation rejection under 35 U.S.C. § 102(b) no difference may exist between the claimed invention and the reference disclosure. *See Scripps Clinic and Research Foundation v. Genentech, Inc.*, 18 U.S.P.Q. 841 (C.A.F.C. 1984).

Along these lines, anticipation requires the disclosure, in a cited reference, of each and every recitation, as set forth in the claims. *See Hodosh v. Block Drug Co.*, 229 U.S.P.Q. 182 (Fed. Cir. 1986); *Titanium Metals Corp. v. Banner*, 227 U.S.P.Q. 773 (Fed. Cir. 1985); *Orthokinetics, Inc. v. Safety Travel Chairs, Inc.*, 1 U.S.P.Q.2d 1081 (Fed. Cir. 1986); and *Akzo N.V. v. U.S. International*

Trade Commissioner, 1 U.S.P.Q.2d 1081 (Fed. Cir. 1986).

In view of the above, the reference relied upon in the office action does not disclose patentable features of the present invention. Therefore, the reference relied upon in the office action does not anticipate the present invention. Accordingly, Applicants respectfully request withdrawal of the rejection based upon the cited reference.

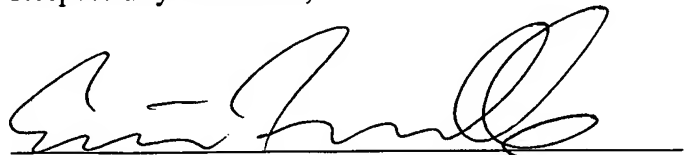

In conclusion, Applicants respectfully request favorable reconsideration of this case and early issuance of the Notice of Allowance.

If an interview would advance the prosecution of this case, Applicants urge the Examiner to contact the undersigned at the telephone number listed below.

The undersigned authorizes the Commissioner to charge fee insufficiency and credit overpayment associated with this communication to Deposit Account No. 22-0261.

Respectfully submitted,

Date: 9/20/06
